**TO WHOM IT MAY CONCERN;**

On behalf of our congregation and community, we would like to express our gratitude to Eco Shield Public Adjusters and the Eco Shield Home Design construction team for the noteworthy time and effort you put into accomplishing a desired outcome for our church facility. Understanding the time constraints, the project was concluded on schedule with the final results being remarkable.

We had a two year roof and didn't think we had any damage, but we realized that hail damage can occur to a brand new car as much as it can to an older car and this also applies to a newer or older roof. We also discovered that it is better to find out if there is damage sooner than later, since if a claim isn't placed right away you are not able to get coverage for later damage. So we decided that an inspection wouldn't hurt anybody and that it would be good to see if we had received any damage from the last hail storm. Sure enough we found quite a bit of damage and were glad to have caught it on time. Eco Shield Home Design's construction crew were also very efficient and highly effective in their labor, replacing flooring, carpeting, ceiling as well as painting and interior damage repairs with top quality materials. We were very pleased with every aspect of the exterior and interior repairs and construction.

You made a huge difference in revitalizing the heart of our community, thank you for the interest and effort put into making our church building suitable for our congregation. We would definitely recommend your company and services to anyone.

**SINCERELY,**

**Rev. Larry Mitchell**
